ABSTRACT

Casino Game or Number Guessing Game both are same, in Casino we have to guess a number and if the number is matched with the Winning Number or Random Number than you will win the Lots of Money. Here in the programming language we have a random number instead of Guess the number is real life. Let explanation our code step by step, First we will Take a Username and total amount of Money in Deposit, Now player can play a Casino Game or Number Guessing Game but before playing a game player need to Bid for every time, Let's Take an example and try to understand the Casino Game or Number Guessing Game.

ACKNOWLEDGEMENT

I would like to acknowledge all those without whom this project would not have been successful. Firstly, I would wish to thank our Computer Science teacher **Mr. Akash Bhagat** who guided me throughout the project and gave his immense support. he made us understand how to successfully complete this project and without him, the project would not have been complete.

This project has been a source to learn and bring our theoretical knowledge to the real-life world. So, I would really acknowledge his help and guidance for this project.

I would also like to thank my parents who have always been there whenever needed.

Once again, thanks to everyone for making this project successful.
