INTRODUCTION

ARKA Jain University, School of Engineering & IT organized a 5 days induction program “SRIJAN’19” for the fresh entrants to B. Tech. programs, in line with the AICTE requirements. The objective of this program was to acclimatize the students to the new environment and get them acquainted with the institution culture. The aim of the program was to give the students who are joining the college a bird’s eye view about various dimensions of engineering and the career opportunities for the engineering students and to acquaint them with the systems and procedures of the college, as also to give them an idea about anti ragging laws. The idea of such a programme came from the thought that one of the reasons for the disorientation of engineering students is sheer ignorance about their opportunities and the direction they have to move so as to become successful as engineering. In the absence of such a structured program, the students could be (mis) guided by the (sometimes) casual approach of their seniors towards studies, and most often by the deliberate miss information given by the seniors about the course and the approach to studies. The program aimed to give a proper orientation to the new students about the course, about engineering and about the future prospects as well as the methodology of learning to be adopted to be successful in life.

The speakers included a mix of internal and external resources.

Following topics were covered in the induction program: yoga, motivation, communication, leadership skill, interpersonal skills, stress management, group dynamics and team building, time management, Examination Skills and New Dimensions of engineering. Dr. Mayukh ghosh, Dy. Chief Manager, JUSCO, Jamshedpur, Jharkhand, was the chief guest of the Program. The program started with Ganesh Vandna , welcome speech by Prof (Dr.) S. S. Razi, Vice Chancellor an introductory address to Students by Prof. Ashwini Kumar (Asst. Dean, School of Engineering & IT).

A total of 60 students participated in this program which was conducted from 19th – 23rd August 2019. Faculty and student volunteers from across programs worked extensively to ensure that the induction was well organized. The following report includes the schedule and brief notes on the various events conducted as part of the induction program.

Inaugural Session of Induction Program

Dr. Mayukh Ghosh, Dy. Manager, JUSCO
- Chief Guest Addressing in Program

Prof.(Dr.) S. S. Razi , Vice Chancellor,
AJU, Addressing in Induction Program

Inauguration Ceremony Agenda

Date: 19th August 2019

Venue: Seminar Hall

Activity	Time	Duration
Opening Speech by Prof. Ashwini Kumar	9.00 am-10.00am	1 hour
Lamp Lighting Ceremony followed by Ganesh vandana	10.00am- 10.20 am	20 mins
Welcome speech by Dr. S S Razi	10.20am -10.40 am	20 mins
Speech by Dr Angad Tiwary	10.40am -10.50 am	10 mins
Song presentation by students(Cultural session)	10.50am -11.10 am	20 mins
Felicitation of Chief Guest	11.10am -11.20 am	10 mins
Session by Chief Guest	11.20am -12.20 pm	1Hr
Speech by student	12.20pm -12.50 pm	30 mins
Vote of thanks	12.50pm – 1.00 pm	10 mins

SCHEDULE

Date	Time	Description
Reporting Room No		Room No 303- Block C
Student Roll No/ Branch		(B.Tech- All Branch)
20.08.2019	8.30 to 9.30	Yoga
	9.30 to 10.30	Visit to respective Dept., Lab n college Infra,
	10.30 to 11.00	Session on Human Value.
	11.00 to 12.30	Creative Arts (Painting, Poster making, Litreary reading etc)
	12.30 to 03.30	Movie, I'am Kalam
21.08.2019 & 22.08.19	8.30AM(21.08.19) to 6.00PM(22.08.19)	Two Days Outbound program at Wave International (Session Conducted by MR. SUMANTO GHOSH)
23.08.2019	8.30 to 9.30	Art of living Sessoin (Room No 206 Block C)
	9.30 to 10.30	Session by Mr. Harcharan Singh
	10.30 to 11.30	Session by Dr. Manikant Paswan
	11.30 to 12.30	Valedictory Function & sweet Distributin

EVENT DETAILS

➤Screening of Inspirational Film

On the 20th of August, i.e. the 2nd day of the week long Induction, SRIJAN'19 the 2nd session conducted for students was that of 'Film Analysis'. The movie, I'am Kalam, was chosen to be shown to the students who were about to enter the new college life. Through the movie, it was aimed to inculcate in students, the values of goal setting, perseverance, determination, crisis management, team spirit, leadership, the role of guides/ mentors, adaptability to change, failure management, etc.

Movie Analysis has been recognized as one of the innovative pedagogies for instilling life skills in students. It is a method removed from the regular 'chalk and talk' way of teaching, wherein students learn through the most impactful visual medium, further strengthened by a fruitful and analytical conversation among themselves.

They enjoyed the sessions and seemed to have acquired their own learnings from the session.

➤Session on Communication:

This session was conducted by Dr. Sonia Riyat, Following points were covered in this session: Leadership: (a) Leader is a dealer in hope. (b) Develop good communication skills(c) Spend quality time in preparations (d) Practice, Practice, Practice (e) Deliver with passion (f) Connect with your audience (g) It is about empowering others.

➤Session on Universal Human Values

On the 2nd day, i.e. the 20th of August, 2018, a number of distinguished speakers and scholars interacted with the enthusiastic fresh entrants. The topics of these talks ranged from spirituality and motivation to Indian social issues and economics.

The programme began with the highly interactive and motivating talk on 'Universal Human Values' was delivered to the students; they were engaged in a refreshing and educative session. His simple words coupled with audio-visual inputs threw new light on the meanings of 'success' and 'education' for the young listeners. In a light-hearted manner, he dwelt upon serious themes.

Students were called on stage for some fun learning practical exercises.

Mr.Harcharan Singh

Mr. Chandershwar Khan

Dr. Manikanth Pashwan

Were the distinguished speakers, who addressed the gathering on their respective area of expertise.

➤ **Motivational session by Mr. Parasnath Mishra**

The next session was by motivational speaker, he shared with the young, energetic minds, the story of Bruce lee, his journey towards accomplishing international fame. In his lucid, amusing, connecting and vivid narration; aided with bright screen images; the youngsters spent a great time travelling through the ups and downs of the story and laughing hilariously at various anecdotes shared. Mr. P N Mishra did an admirable job, thus, by inculcating the spirit of persistence and high aims through sharing his own happy story of passion and zeal.

➤ **Understanding Session by Prof. Mukul Pandey**

Inculcating in technology managers and engineers, a sensitivity towards social issues, has always been a priority. For such prompting, Prof Pandey was invited for delivering an awakening talk. He discussed with the young citizens, various issues that infect our socio-political-cultural lives; and the ways we can make efforts towards resolving the same.

Introduced the students to some rudimentary facts of Indian Economics; as well as gave them some related deeper insights. His analytical expounding informed the students, as also left them eager to understand these realms better.

➤Session on stress management by Dr. Arun Tiwary

A fun based stress-management session by Dr. Arun Tiwary No wonder, his engagement with the excited students was thrilling and power-packed. Through jokes, experience sharing and activities, he could hold the students spellbound and deeply involved. He demonstrated simple approaches towards 'simplifying' life and managing the unnecessary stress even students are so very prone to these days.

Stress Management: (a) Recognizing Stress (b) Wear and

Tear of the body (c) Stress positive and negative influence (d) Short term long term stresses (e) Dietary measures, Stress Beaters.

➤Group Task Event

All students were divided into 4 groups in 2 classrooms. In every class rooms again the group of 10-12 students have been made for group task. Each group was asked to make a street play or a campaign or an advertisement.

All groups enthusiastically participated in the group task event, some wrote the script for the advertisement or street play, some of them were involved in making props or posters for their presentation and some students from each group presented their plays.

Over, this entire event made the students mingle with their new mates and come to know the qualities into them. This group task idea allowed exploring their academic interests and activities, reducing competition and making them work for excellence, promote bonding within them, build relations between teachers and students, give a broader view of life, and build character.

➤Introduction to extra-curricular activities

There are various technical committees in the Institute cultural committee through which they organize many events under the guidance of faculty members. The session

“Introduction to extra-curricular activities” was to introduce these cells and their activities to the first year students.

The event was conducted in classrooms with One faculty member and two student volunteers were assigned to each class. The heads of various committees were assigned the task of sharing their vision and objectives of the respective cell and to introduce all the major events organized by these cells in the institute. They motivated the students to become the member of the cell by explaining the advantages of being in these cells. In general, it gave an insight to the students on the extracurricular and co-curricular activities happening in the Institute throughout the year which will help them improve their soft skills.

CARVAAN, the excursion trip for students was also spoken about, the students were briefed about the trip and registrations were also made.

Department Visit

In this session students of B. Tech introduced to the respective programs and its objectives. Faculty gave details regarding courses, internships, laboratories. Students were also apprised about the various opportunities in research and industry. The event was coordinated by the respective group in charge. The students of various programs were addressed by their respective Department and senior faculty.

The presentations included details:

- Introduction to the program and program objectives.
- Various opportunities in industry as well as research.
- Outline of the respective course in detail.
- Elective subjects, projects, internships.
- Departmental labs.

➤ Outbound Activity

RESOURCE PERSON: MR. SUMANTO GHOSH

Faculty representatives:

1. Prof. Neeharika Bakhla
2. Prof Nivedan Mahato
3. Mr. Ranjit Kumar

❖ DAY 1:

Session has been started by the introduction; what is technicality and why? Then brief talk has been conducted about the dressing sense about the formal wearing, thereafter a theme has been discussed that is **BE THE BRAND.**

❖ DAY 2:

The day has been started with the activity named bouncing the ball, their after emphasis is made on what is the present scenario and demand of the industries, other intellectual themes were discussed, the session has been ended up with a talk about Discipline, team work, co-ordination, industrial and personal updation.

ACKNOWLEDGEMENT

The School of Engineering & Ppolytechnic department extends heartfelt gratitude to the Vice Chancellor, Dr S.S Razi, Director Mr. Amit Srivastava, Registrar Mr. Jasbir Singh Dhanjal, Dean cum Controller of Examination Dr. Angad Tiwary and all members of the ARKA Jain University for their support.

The department also extends its gratitude to Mr. Parasnath Mishra for his unstinting support. Thanks also to, the intra university speakers, Dr. Sonia Riyat, Dr. Arun Tiwary, and Prof. Mukul Pandey, also Program coordinator of all the Department for their guidance.

Faculty and staff across departments extended whole hearted support during the induction program. The program was a success because of their active participation.

The School thanks all faculty, staff and student volunteers who have helped, the student volunteers also did a remarkable job.

SHARING EXPERIENCES ABOUT ONE WEEK

INDUCTION PROGRAM AT ARKA JAIN UNIVERSITY

At 31st of August 2019, I registered myself at Arka Jain University as a student of Engineering and Information Technology. It was going to be a whole new experience for me because it was not just another phase of my life but it was also beginning of a new journey of success, hard work and to prove myself in front of all who doubted me even on their scales of measures. I chose the branch of Computer Science for my future because I think it will help me shape my future dynamically. In the 21st century it is very much about not just knowing but also applying the knowledge which we get from our studies and to me computers were always the subjects of high interest and I will be grateful to this institution for providing me this incredible opportunity. Nowadays computers are the most phenomenal devices present on our earth. So, as I chose this branch of engineering I was so aware of its vast ecosystem and tough competition of its environment.

For the first day of my college I was very excited and a bit of nervous. I was excited because today I was going to a whole new place where I would find a new surrounding. I was also a bit of nervous because as the word 'college' struck in our minds, we get a feel of how we are going to coagulate or patch up with new people and teachers. At my arrival

I slowly and gradually observed that the culture here at college is very much different from that of school because it offers careers in various fields but it doesn't force anyone to pursue his or her career in a particular field of education. As I entered the campus there was a big poster in front of me with written key words, letters on it and it was named 'SRIJAN' meaning of this word in the Devanagari script was a new formation. After asking some counsellors I got to know about my classroom. The moment I entered the classroom I saw a whole new number of faces to whom all were unknown to me. I sat on the bench and the teachers entered and informed us about the 1 week induction program which was designed as per the VC norms to help students get familiar to the classroom environment and college culture. After explanation teachers told us that there is going to be a two day off-campus induction program which was initiated by the college itself so, that new students must get know what they all are here for. They called it as the, 'Outbound Training Activities Program'. They also provided us the registration forms for our appearances at AICTE portal and to the registration as well. And at all they told us that this one week induction program was named 'SRIJAN', which in my point of view fits perfectly into the resolution of this balanced and enthusiastic phenomenon. Preceding the

announcement our teachers took our attendance and after that we all were transferred to the auditorium where the stage was set for the inauguration and we held our seats the event continued. The institution invited all the guest members such as Chancellor, Vice-chancellor, Dean, Registrar and H.O.D. also all special guests. First of all there was a inauguration ritual and then the guests were greeted by offering shawls and saplings. Following this the Vice-Chancellor of our college came up on the stage and I was surprised to see that he was none other than Dr. S.S. Razi.

I remember Dr. S.S. Razi from my school days when once he acknowledged me by tapping my shoulders and saying that, "The fate of this generation relies on your shoulders children, so be tough and work hard because your country needs such citizens who can lift it up to the heights of excellence?" After a quick turnaround I saw and heard him again as I did before. He focused his thoughts by saying that we have to shape ourselves according to the demand of the time and rather than running after quantitative knowledge we have to accumulate qualitative intelligence and to redefine this era. Proceeding this ceremony we had a glimpse of knowledge of our seniors, when one of them delivered a marvelous speech which quoted two beautiful thoughts those were, "The work of a lamp is to lighten your paths," and that, "A good is the one who not only can teach but more of it can inspire

her/his students shape her/his future in the right direction. After this we had one of our seniors singing vandana for this auspicious occasion and then we had a group of our seniors performing music and singing songs for us. After that we had a knowledgeable person attending us on the topic of E-waste management. He informed us about how E-waste is polluting our life cycle by dissipating high-risky chemical compounds and elements into it. He also informed us about its core and cause and how to treat this biological harmful substances. Initiating with a startup business which helped the citizens of our city to manage E-waste. Preceding this all of our B-TECH. students were invited to visit our Laboratories with Lab. Instructor Ranjeet Sir. Him being a very energetic personality took us to the each and every laboratory representing the idea of the college. After this visit we returned to the auditorium where now we had official staffs distributing our identity card. This was the last work performed by the officials and by this we ended our first day at ATU, which was very impressive and fabulous.

Preceding this we had the second day of program which was conducted the next day and it started by the attendance of students and collection of forms which

were provided to us on the previous day by our teachers. We also had an announcement about a 10 days trip sponsored by the university which would be predicted in December and offered us different destinations. By this announcement we were held by Yoga tutors from the Royal Yoga who were appointed the institution for the physical and mental compilation and strengthening of our soul, mind and body. We were taught yoga poses that can help us concentrate and maintain optimum functionality of our physique. We were also taught Suryanamaskar which was really efficient in controlling energy activation of our body. After that the students at Royal Yoga presented some difficult and crucial yoga poses which were almost impossible for any of us to perform. Preceding this event our seniors arranged a number of different activities by them. One of the event was E-gaming. Participating in the event we all opted for activity as we thought of. I took part in the E-gaming which was a team event and in which I finally found some friends. Learning up we easily won the event and I had a overview of our computer laboratory. I was really enjoying program at this time where I finally found some friends. This was ~~the end~~ the end of the second day of the program and the next

day we were informed to accumulate at the city office bus where we were held by our teachers, by the time waiting for the college transport we discussed about ourselves between the friend circle which was freshly formed the 2nd day at the E-gaming event while playing. We departed bus there to our venue by college's transport facility at 9:35 A.M. After a travel of half an hour journey we reached our ~~journey~~ destination which was pre-decided by university staff, which was one of the finest resort in our city named, "The Wave International", approaching the venue I had a gut feeling that this is going to be a remarkable trip and I am going to learn a lot from this trip. We directly approached the seminar hall where arrangements were processed by hotel staff. There I saw a man silently doing his work on his own. I was a bit confused because he was from a completely different age-group and behavior. Later on we got to know that he was the guest lecturer who was there to attend us. Proceeding the activity I slowly got to know that it was a pre-planned setup built to enhance our skills and thought. He began with a simple topic on unemployment. He discussed about the problems the youth faces due to his inexperience and less knowledge of surrounding. He also discussed about the quality a

person who he should ~~so~~ really maintain as an alpha or leader. He told us that it is the time when even a kid wants to rule his own life but a leader always keeps his team ahead of himself as there is no 'I' in the word 'TEAM'. He praised a particular community which were Sikhs for their kindness and helpful nature and taught us to be helpful to everyone. Following on his lecture he taught us to improve our sense of perception. He made us understand that no matter what we see or hear, sometimes things are totally opposite of our sense of perception. He was determined to test us so he constantly induced us with riddles. He gave us tasks over ourselves, so that we may know ourselves more than anyone else does. That is why Sumanto Ghosh is the name I am never going to forget in my entire life. Yes, this was his name and he told us that has taught in many of colleges and universities and right now he is working with IITM. After this we had tea-time break and we were served by hotel staff who were very gentle and humble. During our tea break he observed some of us misbehaving in the presence of ~~everyone~~. After break he acknowledged us over behaving in front of others and gave tasks by which we can understand each other. He then made us aware of Artificial Intelligence and its advantages and disadvantages. He mentioned that in future A.I. is going

to have a great ~~impact~~ ~~impact~~ impact on our human civilization and many jobs are going to be affected by this computer generation. He also advised us to be more precise on the machine learning as it is the second most affecting phenomenon by such as robots. He advised us again that if we do a particular work then it does not affect the result on the factors of what we did but it will always be remembered how we did that work. He then taught us that the world is changing at a constant speed and in this changing world nothing is permanent that means change is the only ~~or~~ constant. He also held us on the topic of utilization of given or present resources ~~given~~ at the time of a job as in daily life. He taught us not to waste any resource even if it is natural or man-made. He visualized us by a particular drill that if today we are not planning for anything before doing it we are actually planning to fail to do such work. As a engineering students we must plan every thing ahead because this is what we are, we are engineers we do ordinary things in an extraordinary style and class. He attend us on the topics of forum and class. He told us that go for the class not the forum because

forum is temporary but class is permanent. Following his speeches we had the time for our lunch. So, we had our lunch so did he. The food quality was good enough from the hotel and everyone enjoyed it. After the lunch he introduced us to more of practical knowledge than that of vocal. He showed us some modern manual of engineering and says this he meant us to be visionary because if some thing is real first it would have been in someone's thoughts. He mainly focused on the Civil Engineering & Mechanical engineering to show us the power of visions. He then held us on the topic of Reuse - Reduce - Recycle as all we have is gifted from nature and we must admire it. He asked us to come with more and more ways of recycle and to be innovative. As the world knows that innovation is the result of necessity and necessity is the mother of invention. So, if we go after innovation we result in doing same invention. He then introduced us with some more assignments. Preceding this we had the end of our session and we were allowed to check in our allotted hotel rooms. At the evening we enjoyed at the pool at the hotel and we had tonnes of fun after a long but exciting and knowledgeable lecture we had time for ourselves and

friendship between us even got more stronger. After our pool time we were asked to report at seminar hall at 8:00 P.M.. We report there and saw a whole different weather because the lecturer organised this session as a entertaining purpose. We were asked to sing and perform which was great experience. Later we were joined by our more teachers and also our Dean with his family. There we formed a chat group by Ashwini Sir and then we had our dinner. After dinner we were back to our rooms and rested until morning of the next day.

The next day started a bit of easily as we had our breakfast before our sessions. Again it was well organised by hotel and they excelled it. After the breakfast we returned to the seminar hall. Today we were emphasized by a completely new thought that was the existence of human being on this planet earth and if there is possibility among us to reach some beings similar to human beings. In a very short documentary we got to know that several solar system form galaxies and several galaxies form universe and if we try to travel from earth to the nearest universe it would take 45 billion light ~~of~~ years to just exit our universe. So by this he said that none is smaller or lesser than anyone on

this planet Earth. This day he constantly challenged us with numerous brain teasers, common sense riddles and brain teasers. He tested our skills on an entire different level. He divided us into two teams and taught us the principles of co-ordination, teamwork and planning ahead. He then taught us the importance of dressing sensibility and how to dress differently on different occasions. He also told us to work on our soft skills so that we must maintain prestige of ourselves and others. He gave us works related to puzzle to solve via co-ordination and utilisation. He provided some extra-knowledge area pursuing job-like preparing M.O.O.C., getting free GOOGLE android certification, learn how to digitally market products and services also to learn ANDROID, JAVA and PYTHON. He initiated us towards outdoor tasks and taught us to be ready in every condition for so whatever is there at the place of need at work. He said us to learn how to handle pressure and to contain it. At last he gave us some construction works related straws and popsicles to build shapes and catapult. After all there was a competition of scoring inside a space with a ball and that was it. We bid farewell to him and hotel and it was a really great experience to myself.

The college's transport was ready and as we mounted over it, we left the hotel in the evening and arrived at college's town office about 5:35 in the evening. This ended our 4th day of puzgam.

On the fifth day of puzgam we had an another guest at our class who was a engineering graduate and was offering soft skills improvement classes to our college's students. He explained how important these skills are in our professional career to achieve respective goals and success. Then after we were interacted by our seniors who asked us about our vision and aim in the future. They also assured that any problem of us can be made simple by them, we just have to ask from them. In the replacement of this they just asked to be well behaved and respect each other. Following this we were again assembled at the auditorium as today there was a special guest, he was the H.O.D. of Mechanical engineering at National Institute of Technology Jamshedpur. His name was Mr. Mani Kant Paswan. He held us over the topics related to manufacture of steel at India and the dominance of India at global market. Moreover we were acknowledged by Mr. Mukul Pandey. He realised us over the government projects and need of engineers in the globe. He also requested us to not being introvert and share our problem with others. He also related us to find the hidden talent inside us.

Thereby this finished our one week induction program and it was one of my greatest experience. Everything were well organised and well planned. Admiring Mr. Sumanta Jyash was one ~~of~~ of the finest people I had ever met and this all was a whole new, exiting, great and unimaginable experience for me.

I thank gratefully the ARKA JAIN UNIVERSITY and its management for designing this schedule. I wish I can ever experience it again.

Experience about the Induction Programme

The Induction programme was held in the college campus (Block C), and it started on the 19th of August. The induction meet was named "SRITAN 2019", which means "THE BEGINNING." The programme started with the lighting of the lamp by the chief guest and the faculty members.

We were introduced about the facilities which would be provided by the college. The best thing which really impressed me about the university was the discipline, DISCIPLINE is the first most priority in the college.

The induction meet consisted of various sessions. There was also a two-day induction meet held in THE WAVE INTERNATIONAL RESORT. The students were accompanied by our DEAN, Mr. Ashwini and our main Mrs. Ragini, and also our seniors. Various guests were invited as chief guests for the induction meet, from different institutes, like

NIT Jamshedpur, Co-operative college, JVS CO.

They introduced us about the real reality of the engineering world, the competitions we would be facing. We had YOGA session, which helped ~~us~~ us to relieve our stress and to concentrate and stay focused in our work.

We were even taught about various techniques of 4-Waste Management. The chief guest who had been invited from Co-operative college Mr. Mr. shared his college life experiences, gave us tips to face this competitive world. The two-day induction meet held in the resort helped the students to interact among themselves and share their thoughts.

8/10
Last but not the least, the induction programme was well organized and a lot of efforts had been put up by our seniors and faculty members. Everyone appreciated the induction meet. We were even given a feedback form to fill up at the end of the session.

All over it was a very good and knowledgeable experience and honestly I am very proud to be a part of this university.

INDUCTION FEEDBACK

Name of Student: ANISH KUMAR

Name of Programme: BRITAN '19' (INDUCTION PROGRAM)

Date: 23rd August 2019

This questionnaire is to be completed after your induction programme is finished (normally 3 to 4 weeks into your programme starting). Student feedback is an important process within the ARKA JAIN University, Jamshedpur and an opportunity to gain your views and opinions which will help us improve the quality and standards of our provision in the future.

Please circle the number you think is appropriate and then providing more detailed response in the box at the end of the form if appropriate. The questionnaire is anonymous and as a result no-one will be able to trace your comments back to you. Once completed the results of these questionnaires are analysed by your programme team and an overview compiled that will be discussed in programme team meetings and annual monitoring reports.

A. MY INDUCTION PROGRAMME

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Was informative	5	✓ 4	3	2	1
Was effectively designed	5	4	✓ 3	2	1
Was well organised	5	✓ 4	3	2	1
Helped me to feel more prepared	5	✓ 4	3	2	1
Helped me to understand wider Institute services	5	4	3	2	1

INDUCTION FEEDBACK

Name of Student: ANUSHA TRIPATHY

Name of Programme: INDUCTION PROGRAMME

Date: 23/08/2019

This questionnaire is to be completed after your induction programme is finished (normally 3 to 4 weeks into your programme starting). Student feedback is an important process within the ARKA JAIN University, Jamsheepur and an opportunity to gain your views and opinions which will help us improve the quality and standards of our provision in the future.

Please circle the number you think is appropriate and then providing more detailed response in the box at the end of the form if appropriate. The questionnaire is anonymous and as a result no-one will be able to trace your comments back to you. Once completed the results of these questionnaires are analysed by your programme team and an overview compiled that will be discussed in programme team meetings and annual monitoring reports.

A. MY INDUCTION PROGRAMME

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Was informative	5 ✓	4	3	2	1
Was effectively designed	5	4 ✓	3	2	1
Was well organised	5	4 ✓	3	2	1
