

## Report on Workshop On PCB Making Held on 27.04.2019

<b>Date of Event</b>	27.04.2019
<b>Name and Type of Event</b>	<b>Workshop On PCB Making</b>
<b>Conducted by</b>	Mr. AshwiniKumar,Vidya Shree M, KundanPramanik, S.SakenaBenazer
<b>No. Of Participant</b>	50

The printed circuit boards are very vital part of a modern electronic equipment. PCB is an acronym for printed circuit board. A basic PCB circuit consists of a very large number of passive and active components. All the components are connected from side to side with traces on the board. It is absolutely possible to develop very large circuits on small printed circuit boards with the availability of very small sized electronic components. All students from Electrical Department have actively participated in the workshop.
