About WhiteHat Hr

- Today, in the computer age, not all schools teach coding in early childhood resulting in a significant gap in the new world's requirements and our children's skills.
- To address the need, WhiteHat Jr has introduced the "EDGE Program," which prepares the kids from Grade 1-12 for this new coding world by associating with schools to teach kids coding in a physical teaching format.
- They learn fundamentals of coding--logic, structure, sequence, and algorithmic thinking--to generate creative outcomes like animations and apps.
- They are now present in 100+ schools PAN India in a short span of 2 months & envision reaching every kid in our country to make them future-ready by teaching coding in their school computer lab.
- Since their curriculum is developed by industry experts and the most crucial activity of teaching coding is done by trained & certified teachers, learners get state-of-the-art education through their propriety, creative activity-based curriculum.

TENTATIVE JOINING DATE/PERIOD: IMMEDIATE

ANY BOND/SECURITY AMOUNT: NONE
