COMPANY PROFILE:

Saras Analytics is a data management and predictive analytics company focused to solve your data challenges. By leveraging their solutions, customers can get a 360-degree view of their business data with comprehensive reports and dashboards in a fully managed data warehouse. They are a one-stop solution provider with a group of engineers, analysts, data scientists, and domain experts helping businesses deliver data where it exactly needs to be in order to become truly data-driven.

Our Products:

Daton: **Daton** is an ETL cloud data pipeline built for analysts and developers to replicate data at scale and in real-time. It lets businesses consolidate data from multiple disparate data sources and applications into a central location where it's ready for quick analysis. Daton supports 100+ ready-to-use integrations across Databases, Cloud Storage, SaaS Applications, SDKs, and Streaming Services. With Daton businesses can focus on enhancing their analytics efforts without worrying about building and managing a data pipeline.

Halo: **Halo** is a business intelligence and analytics platform built to transform ecommerce data silos into actionable data sets and useful reports. It provides essential reports and insights across all facets of e-commerce business including sales, customers, marketing, product, profitability, and customer service. Halo empowers ecommerce and marketing businesses to be laser-focused on revenue generation and profitability by automating tedious reporting tasks and by delivering insights. With Daton and Halo as a part of your infrastructure, you can focus on serving customers rather than managing data and reports.
