

Date of Event	26th Feb 2022
Name and Type of Event	<ol style="list-style-type: none"> 1. Prof. Syed Rashid Anwar on the topic "Software Defined Networking". 2. Prof Maniranjan Kumar on the topic "Groundwater Contamination"
Conducted by	Dr. Anupam Kumari
Number of Participants	28

The Resource person Prof. Syed Rashid Anwar and Prof Maniranjan Kumar are Assistant Professor of the School of Engineering and IT, ARKA JAIN University, Jamshedpur.

The speaker gave informative and illuminating lecture with valuable content. The session was very valuable for Faculties, Researcher and Students. Software-Defined Networking (SDN) is an emerging architecture that is dynamic, manageable, cost-effective, and adaptable, making it ideal for the high-bandwidth, dynamic nature of today's applications. This architecture decouples the network control and forwarding functions enabling the network control to become directly programmable and the underlying infrastructure to be abstracted for applications and network services. This model differs from that of traditional networks, which use dedicated hardware devices (i.e., routers and switches) to control network traffic. SDN can create and control a virtual network – or control a traditional hardware – via software. While network virtualization allows organizations to segment different virtual networks within a single physical network, or to connect devices on different physical networks to create a single virtual network, software-defined networking enables a new way of controlling the routing of data packets through a centralized server.

Groundwater contamination occurs when man-made products such as gasoline, oil, road salts and chemicals get into the groundwater and cause it to become unsafe and unfit for human use. Materials from the land's surface can move through the soil and end up in the groundwater. For example, pesticides and fertilizers can find their way into groundwater supplies over time. Road salt, toxic substances from mining sites, and used motor oil also may seep into groundwater.

In addition, it is possible for untreated waste from septic tanks and toxic chemicals from underground storage tanks and leaky landfills to contaminate groundwater. Drinking contaminated groundwater can have serious health effects. Diseases such as hepatitis and dysentery may be caused by contamination from septic tank waste. Poisoning may be caused by toxins that have leached into well water supplies. Wildlife can also be harmed by contaminated groundwater. Other long term effects such as certain types of cancer may also result from exposure to polluted water.

About the Speaker:-

Prof. Syed Rashid Anwar and Prof Maniranjana Kumar are Assistant Professor of the Dept of Engg, School of Engineering and IT, ARKA JAIN University, Jamshedpur.

Venue and Participants:-

Knowledge Manthan was conducted online on Google Meet Platform. Total participants attended were 28.

DEPARTMENT OF ENGINEERING

KNOWLEDGE MANTHAN

26TH FEBRUARY 2022

Topic - To analyze about the current scenario of the technology in different area.

SPEAKERS

Prof. Syed Rashid Anwar

Topic: "Software Defined Networking"

Prof. Maniranjana Kumar

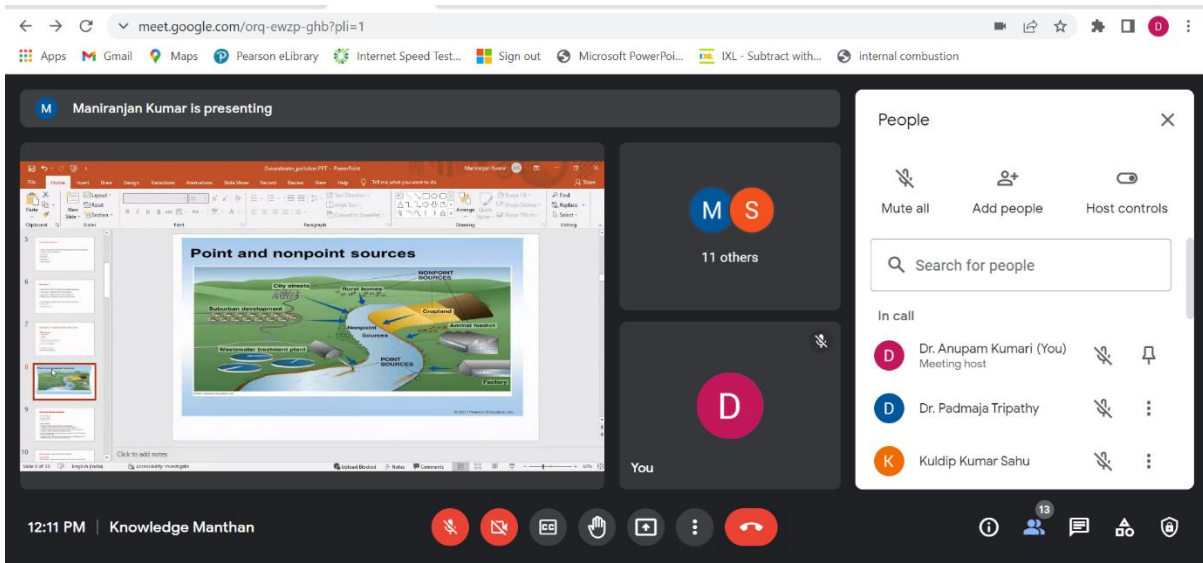

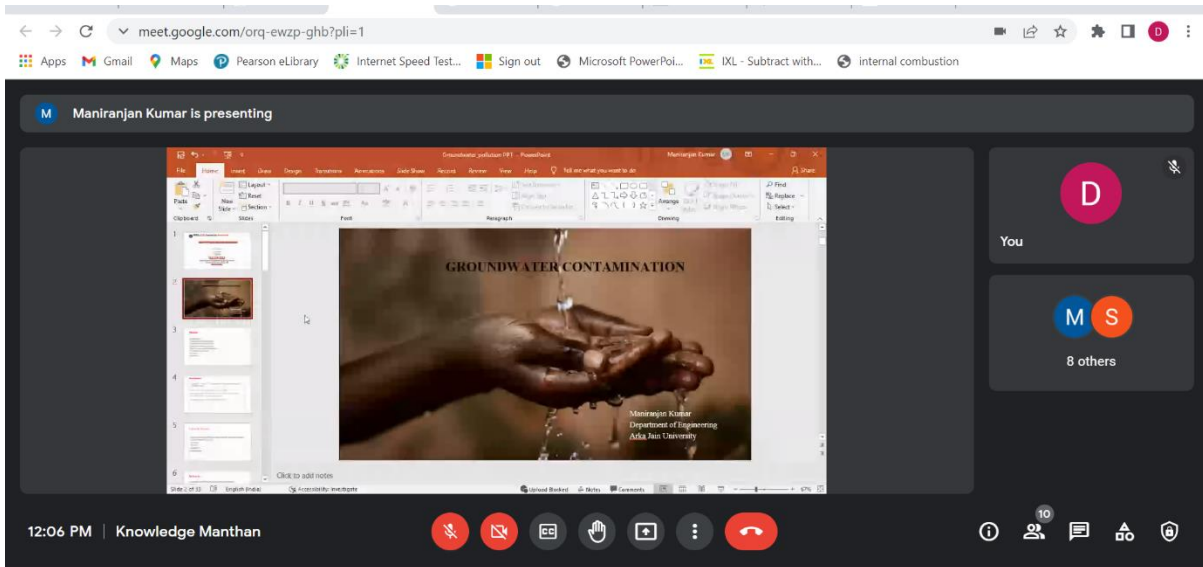

Topic: "Groundwater Contamination"

For: Faculty and B.Tech Students

Contact: Dr. Anupam Kumari | Call: 8987517330 | Email: dr.anupam@arkajainuniversity.ac.in

Meet - Knowledge Manthan

meet.google.com/orq-ewzp-ghb?pli=1

Syed Rashid Anwar is presenting

Traditional Network

- Important tasks
 - Topology planning, configuration, provisioning, etc.
 - Receiving Frame, Table lookup, Forwarding, etc.
 - Parsing Frame, Run the switching or routing algorithm, Compute the lookup table, etc.
