Report on “Optometry: Within and beyond Classroom”

Held on 27.08.2022

| | |
|------------------------|---|
| Date of Event | 27//08/2022 |
| Name and Type of Event | Academic event- Optometry: Within and Beyond [Employability/Career Counselling] |
| Moderated by | Mr Sarbojeet Goswami , Ms Shreya Chakraborty |
| No. Of Participants | 30 |

Objective: The session was conducted as a platform to address questions that generally subject teachers do not take in the classroom. It was also conducted as a career counseling where the speakers explained the importance of various subjects that are included in the curriculum and the future prospects of optometry. They also explained interdisciplinary options for Optometry students.

Detail of the event: On the virtual platform of google meet, students from our own University and a few other institutes joined in and had a brainstorming question answer session after the speakers had delivered their talk. The session was pretty motivating and amazing as it cleared a lot of queries that generally occur in the young minds while pursuing graduation.

Speakers’ profile: *Mr Rupam Sinha* is currently associated with Alcon. He is a motivational speaker for Optometry students, has a dynamic personality and is an enthusiastic sprinter. He was previously the professional head at Cooper Vision Laboratories and his interest lies in Dry eye and contact lenses.

Mr Tonmoy Chattopadhyay is an assistant professor at Vidyasagar College of Optometry. He is an avid researcher and has interest in interdisciplinary approach of vision care in special population. He was previously associated with Bharati Vidyapeeth, Pune.

Outcome: Mr Sarbojeet concluded the session with the vote of thanks and appreciating the efforts of the speaker. A very enthusiastic and zealous session was conducted to feed the young minds with opportunities that wait outside. A lot was emphasized on the elective areas which though being optional has a very significant role in a health care practitioner’s life.

Students were motivated and given a broader perspective of how small Optometry looks, but how massive it is.
