**Report on – CVI Literacy Awareness Month
Held on 11.04.2023**

Date of Event	11.04.2023
Name of the Event	CVI Literacy Awareness Month – A clinical approach to CVI children in optometry practice
Type of the Event	Skill & Professional Development Program
Conducted by	B.Optomety
No. of Participants	11

OBJECTIVE:

The aim of the session was to create awareness about Cortical Vision Impairment as it is hardly talked about in our regular optometry curriculum. Children with special needs require special care and thus, our resource person Ms Shyamali Gandhi, spoke on CVI.

ABOUT THE EVENT:

Ms Shyamali Gandhi Madheshiya is a consultant optometrist at Jamshedpur Eye hospital and she has been associated with paediatric population with special needs. She addressed the gathering and demonstrated the practical approach with videos.

TAKEAWAY (OUTCOME):

Ms Shyamali emphasized on three main points. First being that, developmental age is more significant while dealing with patients, interdisciplinary approach is to be taken for every child and each patient is different. Skills like particular consideration to details , patience and ability to grab attention should be focussed by the clinicians who are working with children with special children.

Poster of the Event

The poster features a blue and white geometric design with a central circular portrait of a woman. The text is arranged in a clean, professional layout. The event details are listed with icons for date, time, and location. The speaker's name and credentials are prominently displayed at the bottom left. Social media and contact information are provided at the bottom.
