Global Handwashing Day

Date of Event	16/10/2023
Name of the Event	Global Handwashing Day
Type of the Event	Extension Activity and Life Skill Development Programme
Conducted by	Department of Optometry
No. of Participants	10

OBJECTIVE:

The event promotes preventing the spread of diseases through promotion of regular and proper handwashing as washing ones hands can have a profound impact on individual and public health and it encourages ongoing efforts to make handwashing a regular and wide spread practice.

ABOUT THE EVENT:

Global Handwashing Day is a global healthcare event celebrated to create awareness and understanding about the need for handwashing with handwash as a simple, effective and affordable way to avoid diseases. The department of optometry visited the Musarikudar Primary School in the nearby village of Musari-kudar, to commemorate the Global Handwashing Day. Students demonstrated the appropriate 7 steps of handwashing with experiments and rhymes. Students also talked on the importance of handwashing as school aged children do not usually engage in handwashing practice at critical times such as before eating and after using the toilet thereby, to safeguarding the health and well-being of children. Volunteers also showed them with an experimental approach, how handwashing with soaps results in better cleansing than using just plain water and also distributed handwash, hand sanitizer liquids and refill packs.

TAKEAWAY (OUTCOME):

Global Handwashing Day is yearly reminder to raise awareness about the importance of handwashing, promoting good health and potentially contributing to public health by reducing spread of disease. Practicing frequent and appropriate handwashing is a fundamental skill for leading a healthy life and to prevent children, teens and adults from many communicable diseases.

Conclusion:

The visit to the primary school was beneficial for the small kids in the remote village and a reminder of how Covid-19 in first place started spreading. Therefore, to avoid any kind of infectious and contagious disease, handwashing is important.
