OBJECTIVE: Zumba, a high-energy dance fitness program, was chosen to promote physical activity, social interaction, and a sense of belonging among students.

Details:- On 17th August, 2023 the BBA department conducted a Zumba Session for the BBA first year students as a part of their inbound orientation program. The session was led by Trainer Ms. Usha Gope. The primary aim of the Zumba session was to introduce new students to a fun and engaging form of physical activity. Zumba is a dynamic, dance-based fitness program that combines cardio workouts with Latin and international music. Trainer encouraged students to maintain a healthy and active lifestyle throughout their university journey. Encouraging students to engage in physical activities from the beginning of their university experience was intended to establish a habit of regular exercise. Zumba, has been proven to reduce stress and promote mental well-being. By introducing students to Zumba early on, we aimed to equip them with a stress management tool that they can use throughout their academic careers. This is also a group activity that encourages social interaction and teamwork. Through this session, we sought to facilitate interactions among new students, helping them make friends and build a support network within the university community. By providing an enjoyable experience, we aimed to set a positive tone for students' academic journey. An engaging and enjoyable induction event can increase students' enthusiasm and engagement with university life.

TAKAWAY (OUTCOME) the first-year student served as a platform for an enjoyable fitness regimen, nurturing their physical well-being, stress management skills, social interaction and inclusivity, fostering friendships and a sense of belonging within the university community. This is also collectively sought to enhance students' holistic development and well-being, ensuring they embark on their academic journey with the tools and connections necessary for a successful and fulfilling university experience.

Participants were demonstrated an improved ability to recognize signs of distress in themselves and others, and actively engage in stress management techniques , leading to a reduction in suicide risk factors and overall improvement in mental well-being. This outcome reflects the goal of such a program, which is to empower individuals to identify and address stressors, thereby reducing the risk of suicide and promoting mental health. The program would need to include specific strategies and interventions to achieve this outcome effectively. The atmosphere of Campus is very good and all the measures have been taken to ensure that the freshers should not feel stressed to pursue their studies. All of this was possible only because of the whole-hearted support from students and teachers

Ms. Sharma began by defining human values as fundamental principles and beliefs that guide human behavior and interactions. It was emphasized that these values are universal and essential to our shared humanity. The talk discussed core human values, including compassion, empathy, honesty, integrity, and respect. These values were presented as the foundation for building harmonious and ethical societies.
