

DEPARTMENT: SCHOOL OF PHARMACY

CIRCULAR

No: AJU/SOHAS/248 (i)/23

Date 20th December 2023

This is to inform all the students of B Pharm 1st Semester that School of Pharmacy is going to organize a session on Model making for clearing the concept on Human Anatomy and Physiology on 22nd December 2023. Students need to participate generously.

MODEL MAKING FOR CLEARING THE CONCEPT ON HUMAN ANATOMY AND PHYSIOLOGY"

Date of Event	22.12.2023
Name of the Event	MODEL MAKING FOR CLEARING THE CONCEPT ON HUMAN ANATOMY AND PHYSIOLOGY
Type of the Event	Participative Learning program/Technical Skill Development
Conducted by	School of Pharmacy
No. Of Participant	53

OBJECTIVE: Model making becomes a valuable educational tool in clearing the concepts for students, providing a holistic and applied understanding of the subject matter.

DETAILS: Model making is an effective pedagogical tool in the study of Human Anatomy and Physiology for pharmacy students. It promotes visualization, tactile learning, interaction, application of knowledge, memory enhancement, group collaboration, and a connection to real-life scenarios, all of which contribute to a comprehensive understanding of the subject matter. Model making in the study of Human Anatomy and Physiology for B.Pharm students enhances understanding through visualization, tactile learning, and interactive experiences. The hands-on approach reinforces theoretical knowledge, encourages application, and fosters critical thinking. Group collaboration and a connection to real-world pharmacy scenarios make model making a valuable tool for bridging theoretical concepts with practical applications, aiding in memory retention and preparing students for their future profession. A model-making session was conducted for B.Pharm 1st sem students to enhance their understanding of Human Anatomy and Physiology. Dr. Shweta guided the students, providing detailed explanations about different body systems. The session was highly interactive and participative, fostering group work skills among students. They were divided into teams to create models of the Digestive, Integumentary, Cardiovascular, Nervous systems, and various organs such as the Liver, Head, and Eyes. The students gained valuable insights into collaborative work. The session was thoroughly enjoyed by all and was conceptualized by Dr. Jyotirmaya Sahoo and successfully coordinated by Dr. Shweta, Ms.Purnima and Mr.Ashutosha.

OUTCOMES: The outcomes demonstrate the effectiveness of model-making sessions in achieving a comprehensive understanding of Human Anatomy and Physiology while promoting essential skills for future pharmacy practice.
