DIABETES AND DIABETIC RETINOPATHY CAMP - 2023

Date of Event	17/11/2023
Name of the Event	Diabetes and Diabetic Retinopathy Camp
Type of the Event	Outreach Extension Activity
Conducted by	ARKA JAIN University
No. of Participants	04

OBJECTIVE:

The objective of organizing a Diabetes and Diabetic Retinopathy Camp is to address the specific healthcare needs of individuals with diabetes, particularly focusing on the potential complications related to the eyes. Here are some primary objectives of such camp:

Early Detection and Prevention:

Identify individuals with diabetes who may be at risk of developing diabetic retinopathy.

Conduct screenings and eye examinations to detect early signs of diabetic retinopathy.

Provide education on the importance of regular eye check-ups for people with diabetes.

Health Education:

Offer information and educational sessions on diabetes management, lifestyle modifications, and the importance of maintaining good glycaemic control.

Educate participants about the link between diabetes and eye health, emphasizing the risk factors for diabetic retinopathy.

ABOUT THE EVENT:

The Diabetes and diabetic retinopathy screening camp was organised on 17th November, 2023 with association of NSS, Young India, CII, Yuva & Health Vertical and facility partner Trinetrans Eye Hospital at IEMCO Industries, Adityapur, Jamshedpur. The target population of the camp was the workers of the industry. Majorly, to identify individuals with diabetes who may be at risk of developing diabetic retinopathy. The camp was conducted for the screenings and eye examinations to detect early signs of diabetic retinopathy and also to provide education on the importance of regular eye check-ups for people with diabetes. Total 63 workers were screened at the day in which 5 people were diagnosed with diabetic retinopathy and were referred to the base hospital.

TAKEAWAY (OUTCOME):

The takeaways from a Diabetes and Diabetic Retinopathy Camp is to contribute significantly to the overall health and well-being of individuals with diabetes. Here are some key takeaways:

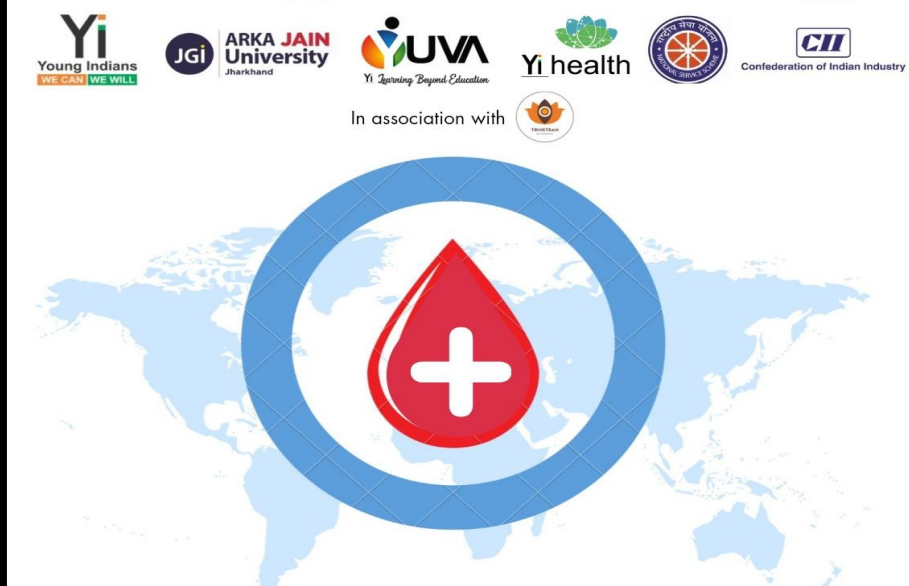

Early Detection and Intervention:

Participants gain awareness about the importance of regular eye check-ups for early detection of diabetic retinopathy. Early intervention and timely treatment can help prevent or manage complications effectively.

Education and Empowerment:

Attendees acquire essential knowledge about diabetes management, including lifestyle modifications, diet, exercise, and medication adherence. Empowered with information, participants are better equipped to take control of their health and make informed decisions.
