Industrial Visit to Trilochan Netralaya -17th February 2024 to 21thFebruary 2024

Date of Event	17/02/2024- 21/02/2024
Name of the Event	Industrial Visit to Trilochan Netralaya
Type of the Event	Experiential learning
Conducted by	Department of Optometry, ARKA JAIN University
No. of Participants	17

OBJECTIVE:

The objective of the Industrial Visit focusses on growing clinical exposure. The visit addresses the gap between theoretical and clinical knowledge that will help them to understand not only the standard operating protocols better, but also the smooth functioning of the machineries:

ABOUT THE EVENT:

17 students from the Department of Optometry and Vision Science, Arka Jain University started their journey on the date of 17.02.2024, from Jamshedpur to Trilochan Netralaya, Sambalpur, where their Industrial Visit was conducted. The event was conducted for 3 days where the following programs were conducted:

Day 1(18.02.2024): A fresh beginning of the event was given with a conference followed by a workshop, where renowned lecturers, pioneers and clinicians in the field of Optometry like, Dr Aditya Goyal, Mr. Sarbojeet Goswami, Dr Rituparna Ghoshal, Dr Nooraz Zaman, and Dr Somnath Ghosh shared their valuable knowledge and ideas on the stage.

Day 2(19.02.2024): The second day was allotted for OT and OPD visit of the students, where they got exposure on the functioning of a busy OPD, followed by OT visit where they understood the importance of sanitization and sterilization to be maintained when a professional is inside an Operation Theatre. Moreover, as a bonus, they also got an opportunity to witness a phaco emulsification surgery.

Day 3(20.02.2024): The day started with visit to vision centers which were running under Trilochan Netralaya. The students were introduced to a new revolutionary method of patient – clinician interaction known as teleophthalmology, where the patient consults with an expert practioner over telephone. Moreover, the students were lucky to be a part of cataract screen camp team and got exposure on community eye care services.

Day 4(21.04.2024): The fourth day was slotted for an excursion program. The students with their faculty members went to Hirakud Dam (the longest dam in the world) followed by a visit to the sacred temple of Samaleswari, which will bring calmness in their personality, and helped the students to connect with nature.

TAKEAWAY (OUTCOME):

Industrial visits are generally organized to provide the budding optometry students a field experience on how the medical system operates. Having a basic idea of this will not only help them to easily cope up with the OPD set up protocols but also will eventually help them to choose their individual field of interest in the long run. Conferences and seminar by renowned clinicians and professors before starting an Industrial visit would help them to grab basic knowledge on the system to start with, which will eventually lead to better learning.

Conclusion:

With the visit to the hospital Trilochan Netralaya, the students got new experience of the medical industry, better understanding of the world of the work to be done by them in future. The students were able to compare the knowledge acquired in college to the working world health sector .Observations were carried out under real and direct inspection of the mentors which brought their professional skills to a new level, which will eventually prove beneficial for the society.
