NOTICE NO.: AJU/T&P/DIP/0027/23-24

DATE: 29-04-2024

NAME OF COMPANY: APTIV COMPONENTS INDIA PVT. LTD. (IRISH MNC)

PAYROLL COMPANY NAME: APTIV COMPONENTS INDIA PVT. LTD. (IRISH MNC)

Registration Deadline is 11 am, 2nd May 2024.

ABOUT COMPANY:

APTIV COMPONENTS INDIA PVT LTD is an Irish automotive technology supplier with headquarters in Dublin. APTIV grew out of the now-defunct American company, Delphi Automotive System.

The company was established as the Automotive Components Group in 1994 and changed its name to Delphi Automotive Systems in 1995. Delphi disclosed some irregular accounting practices in 2005. A number of executives, including CFO Alan Dawes, resigned. Delphi Chairman J.T. Battenberg retired. Delphi then filed for Chapter 11 bankruptcy protection to reorganize its struggling U.S. operations. As a result of this action, the Securities and Exchange Commission granted an application by the New York Stock Exchange to delist Delphi's common stock and bonds.

Plants in Puerto Real, Cádiz, Spain, closed, with a loss of 1,600 direct jobs, and more than 2,500 indirect jobs in February 2007, despite having agreed to continue its manufacturing operations until 2010 and receiving more than €25 million from various public administrations in order to guarantee its workers' jobs. The Regional Government of Andalusia announced it would begin legal action against the company for breach of local labour laws.

Delphi sued its investors for US\$2.55 billion in securities to aid Delphi as it sought to come out of bankruptcy in May 2008. U.S. Bankruptcy Judge Robert Drain in New York allowed Delphi to seek payments through a contract against Appaloosa Management LP as well as denying an investors' request for a cap of \$250 million for damages. In April 2009 Cool IT Systems announced the acquisition of the assets of Delphi Thermal Liquid Cooling including intellectual property, machinery, and equipment.

Delphi's core assets were purchased by a group of private investors to create a new Delphi Corporation in October 2009. Some of its non-core steering operations sold to General Motors Company, the successor to the bankrupt Motors Liquidation Company that used to be the old General Motors Corporation. The stock was cancelled. The old Delphi Corporation was renamed DPH Holdings Corporation. The new Delphi incorporated in the United Kingdom.

Delphi sold its Thermal Business unit to Mahle-Behr GmbH in July 2015. Together, the Mahle-Behr and Delphi Thermal merger represented the second largest supplier of automotive thermal management systems including interior HVAC components, under-hood powertrain cooling and compressors. The company announced improvements to self-driving technology under development in December 2015. In the same month Delphi bought HellermannTyton for \$1.7 billion.

Delphi entered into a partnership agreement with Carbon in June 2016 to allow use of Carbon's Continuous Liquid Interface Production technology and printers. The company then bought the self-driving startup NuTonomy for \$450 million in October 2017.

The company spun off its powertrain division and aftermarket related businesses (now Borg Warner's Delphi Technologies division) in December 2017 and changed its name to APTIV COMPONENTS INDIA PVT. LTD.. In August 2019, Aptiv and Hyundai Motor Group announced plans to establish a \$4 billion autonomous driving joint venture in which the firms would each have a 50% stake. The companies said the joint venture, which would have its headquarters in Boston, would focus on advancing the “design, development and commercialization of SAE Level 4 and 5 autonomous technologies.” The joint venture closed in March 2020 and was named Motional in August 2020.

In January 2021, Aptiv revealed a new platform for automated driving that can be applied on various vehicles and that carmakers can upgrade wirelessly.

On 11 January 2022, Aptiv announced that they had acquired Wind River Systems, a company known for its development of real-time operating systems.
