"14TH NOVEMBER 2023 WORLD DIABETES DAY"

Date of Event	23.11.2023
Name of the Event	"14 TH NOVEMBER 2023 WORLD DIABETES DAY"
Type of the Event	Life Skill Development Program/International Commemorative Day
Conducted by	School of Pharmacy in association with BHESAJAM the Pharma Club, NSS and NCC of AJU
No. Of Participant	42

OBJECTIVE: The objective is to create a holistic and community-centered approach to address diabetes, promote health awareness, and contribute to the overall well-being of the village population in celebration of World Diabetes Day.

DETAILS: On November 23, 2023, BHESAJAM, the Pharma Club of the School of Pharmacy, in association with NSS and NCC at ARKA JAIN University, organized 14TH NOVEMBER 2023_ WORLD DIABETES DAY. The students, along with faculty members, ventured to the nearby village Musari Kudar at 11:30 am. The primary objective of the camp was to raise awareness about diabetes, conduct health screenings, and provide valuable information to the community members. This initiative aimed at contributing to the well-being of the villagers by identifying potential health risks related to diabetes. The venue was strategically chosen to ensure easy accessibility for the villagers and to maximize community participation. A team of students from the School of Pharmacy screened approximately 45 patients from the village. Each patient underwent a thorough examination, including blood sugar level testing and weight measurement. The screening process was conducted with precision and empathy to ensure accurate results and a positive experience for the patients. Blood sugar level testing was a key component of the health camp, given the focus on diabetes. Glucometers were used to obtain instant and reliable blood sugar readings. Patients with abnormal results were provided with immediate counselling and guidance. Weight measurement was conducted to assess the overall health and well-being of the patients. Understanding the link between weight and diabetes, personalized recommendations were provided to individuals requiring lifestyle modifications. The School of Pharmacy students engaged in one-on-one sessions with the patients to discuss their health conditions and provide detailed information about diabetes.

The health camp proved to be a significant success, with several positive outcomes, including the identification of potential cases of diabetes at an early stage, allowing for timely intervention and management. The villagers were empowered with knowledge about diabetes, enabling them to make informed decisions about their health. Patients received personalized guidance on lifestyle modifications, diet, and exercise to manage and prevent diabetes. The community responded positively to the initiative, expressing gratitude for the free health services and information provided. The entire event was conceptualized by Dr. Jyotirmaya Sahoo and was successfully coordinated under the guidance of Mr. Dusmanta, Mr. Pravas, Mr. Atal, and Ms. Purnima.

OUTCOMES: The health camp organized by the School of Pharmacy in Musari Kudar Village on World Diabetes Day was a commendable effort to address health concerns and promote well-being in the community. The active involvement of students showcased their dedication to making a positive impact on the lives of individuals. The success of the event highlights the importance of such initiatives in fostering a healthier society. The School of Pharmacy remains committed to its mission of community service and looks forward to organizing more health camps in the future.
