EXPERT TALK ON AN OCULAR ASSESSMENT

Date of Event	20th November 2024
Name of the Event	VISION HUB- Expert Talk on An Ocular Assessment
Type of the Event	Professional Skill Development Program
Conducted by	Ms. Bhavana Kumari, DEPARTMENT OF OPTOMETRY, ARKA JAIN University
No. of Students Participated	21

OBJECTIVE: The session was to organised for increasing and revise the knowledge of 3rd semester students, before their external examination. The objective of the expert talk on *Ocular Assessment* is to raise awareness about the importance of regular eye check-ups and the role of early detection in preventing vision impairment. The session aimed to provide attendees with a comprehensive understanding of key ocular assessment techniques, such as visual acuity testing, slit lamp examinations, and tonometry, while also showcasing the latest advancements in ocular health technology. Additionally, the event sought to highlight the critical role of eye care professionals in diagnosing and educating patients about eye health. Ultimately, the goal was to equip healthcare professionals, students, and the broader audience with knowledge that could enhance their practices and contribute to better overall eye care and disease prevention.

DETAILS: On November 20, 2024, the Department of Optometry, School of Health and Allied Science, Arka Jain University organized the Expert Talk on “*An Ocular Assessment*”, conducted virtually by Ms. Afreen Khan, ex- clinical tutor, CL Gupta School of Optometry, with extensive experience in ocular health. The event aimed to provide participants with a comprehensive understanding of the various techniques used in ocular assessments and the importance of early detection in preventing vision impairment. Ms. Khan covered a range of topics, including the anatomy of the eye, common ocular conditions such as glaucoma and cataracts, and diagnostic methods like visual acuity testing, external examination, motor examination, slit lamp examination, tonometry, and fundus examination. She also discussed the latest technological advancements in ocular assessments, such as Optical Coherence Tomography (OCT) and automated refractors. The session emphasized the role of optometrists and eye care professionals in diagnosing, treating, and educating patients about eye health. Students had the opportunity to engage in an interactive Q&A session, where they received valuable insights and practical advice from the speaker. The event successfully achieved its goal of enhancing

awareness about ocular health and encouraging preventive eye care practices.

OUTCOMES: Before the 3rd semester external examination, to make their fundamentals more clear about an assessment of an eye, Ms. Afreen helped students in better understanding. Attendees gained valuable insights into the significance of ocular assessments and the latest diagnostic techniques used to detect eye diseases. The session equipped participants with knowledge about essential tools such as slit lamp examinations, tonometry, and fundus examinations, along with an understanding of emerging technologies like Optical Coherence Tomography (OCT). By emphasizing the importance of early detection, the talk encouraged students to prioritize regular eye check-ups and adopt preventive measures. The event fostered a greater appreciation for ocular health, empowering attendees to implement better eye care practices in their personal and professional lives.
