Description	About StoreKing

About StoreKing

StoreKing is an innovative digital platform revolutionizing how small retailers, shop owners, and micro-entrepreneurs engage with the online marketplace ecosystem. Our Goal is to empower local businesses by providing them with tools and resources to thrive in the digital age.

At Storeking we bridge the gap between traditional retail and modern online marketplace, offering a seamless experience for businesses to manage inventory, track orders, and enhance their reach without the complexities of setting up their own online store. We offer a comprehensive suite of services that include product listings, order management, and a robust delivery network, ensuring small businesses have the support they need to compete in an increasingly digital marketplace.

Our platform helps shop owners diversify their offerings, increase product visibility, and scale their businesses, all while maintaining the personal touch that their customers love. Whether youre a small neighborhood shop or a growing retail business, Storeking.in provides a trusted and scalable solution for success.

Our Vision

To empower millions of small-town local retailers and entrepreneurs, helping them digitally transform and thrive in the global online marketplace ecosystem.

Our Mission

To provide affordable, scalable, and accessible digital solutions to small and medium-sized businesses, enabling

them to grow and adapt to modern consumer demands.

Location Bengaluru Corp Office

Role BackEnd Developer

Role Overview

As a Backend Developer at Storeking Club, you will play a key role in designing, developing, and maintaining robust backend systems that power our business. The ideal candidate should have hands-on experience with Node.js, a strong understanding of microservices architecture, and expertise in database programming. Your focus will be on delivering scalable, secure, and high-performance solutions while collaborating closely with cross-functional teams.

Role and Responsibilities

- Develop and maintain backend services and APIs using Node.js and the Express framework.
- Design and implement microservice-based architectures to ensure scalability and flexibility.
- Create and optimize database solutions using MySQL, MongoDB, and Redis.
- Develop algorithms and design patterns to solve complex problems efficiently.
- Ensure robust performance tuning and threading for high-performance systems.
- Break down complex features into smaller, manageable tasks for better team comprehension and execution.Collaborate with cross-functional teams to translate business requirements into technical solutions.Identify risks, dependencies, and potential issues in processes, team coordination, and deliveries proactively.Think strategically about scalability, security, and code reusability to meet non-functional requirements.Required SkillStrong proficiency in Node.js, Express Framework, and JavaScript (object-oriented).Hands-on experience with technologies such as Redis, Elasticsearch, MongoDB, and MySQL.Expertise in microservices architecture and database programming.Solid understanding of OOPS programming paradigms, data structures, and design patterns.Knowledge of threading and performance optimization techniques.Familiarity with Agile methodologies and practices.A proactive approach to identifying and mitigating risks in development and delivery processes.Exceptional problem-solving skills and ability to work in a collaborative environment.Any knowledge of front-end technologies is a plus.

Why JoinUs?

- Opportunity to work closely with founder and gain firsthand insights into business strategy and leadership.
- Be part of innovative projects leveraging cutting-edge

technologies.
- Collaborative and growth-oriented work environment that fosters learning and creativity.
- Access to mentorship and guidance to enhance technical and professional skills.
- Competitive salary package with opportunities for career advancement.
