SCHOOL OF NURSING

Ref. NO: AJU/SON/188/24

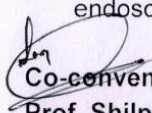

Date: 16/10/2024

We are delighted to announce that the School of Nursing, ARKA JAIN University is going to organize an Observational Visit to the **Endoscopy Room and Radiology Department** at **MGM Hospital & Medical College, Jamshedpur**, has been scheduled for **28th October 2024** commencing from 09:30 am for GNM Students session 2022-2025. The visit is organized to provide practical exposure and **Kinaesthetic Learning** for students, enhancing their understanding of medical procedures and the functioning of advanced medical equipment.

Learning Outcomes:

After the visit student will be able to:

- Understand the clinical processes involved in **endoscopic procedures** and the role of nurses.
- Gain insights into the **radiological imaging techniques** used in diagnosis.
- Explore various types of **diagnostic equipment** and their applications in healthcare.
- Enhance knowledge of **patient care**, particularly pre- and post-procedure care in endoscopy and radiology.

OBSERVATIONAL VISIT TO ENDOSCOPY ROOM & RADIOLOGY DEPARTMENT- MGM HOSPITAL & MEDICAL COLLEGE

Date of Event	28.10.2024
Name of the Event	OBSERVATIONAL VISIT to ENDOSCOPY ROOM & RADIOLOGY DEPARTMENT- MGM HOSPITAL & MEDICAL COLLEGE
Type of the Event	Awareness of Trends in Technology
Conducted by	School of Nursing
No. of Participants	12

OBJECTIVES: To develop a deeper understanding of the complexities involved in providing care to patients undergoing haemodialysis.

DETAILS: On **25th October 2024**, the **School of Nursing, ARKA JAIN University**, organized an observational visit for 02nd Year GNM Nursing Students to the **ENDOSCOPY ROOM & RADIOLOGY DEPARTMENT** at **MGM Hospital & Medical College, Jamshedpur**. This visit was an integral part of the curriculum which will help the students in providing with hands-on learning in clinical settings, allowing them to observe advanced diagnostic procedures and deepen their understanding of patient care techniques in specialized units.

The practical integration of theory and practice was strengthened through observational visits in the people or groups of healthcare in practice. This was enhanced by allowing students to see, comprehend, and witness how their future co-workers go about their daily work duties in various units. Hence, studying the procedure and interaction as well as experience in endoscopy, radiology, and operating theatre facilities expands the knowledge base of students regarding the patient care continuum.

It was learned how gastrointestinal nursing care involved specialized procedures that could be observed first-hand in the endoscopy room. It was possible to understand the sequence of assessment, preparation, and care due to witnessing the procedure of endoscopic examinations. In particular, several infection control procedures and application of technology during endoscopy were noted during the tour. Endoscopy takes a team and communication is vital especially during stressful procedures and this experience reinforced the essence of primary health care. There were nursing implications that emerged during the coursework that focused on the role of nursing towards optimal patient care outcomes in gastroenterology and these were comprehensively addressed during the breadth of the course. The 02nd Year GNM Nursing Students had the chance to witness and comprehend some diagnostic imaging techniques during their rotation in the Radiology Department, namely X-rays, CT-scan and MRI. They understood how the patient must observe both positioning and safety measures and what a fundamental task radiologic technologists have in the production of diagnostic images. Furthermore, the students appreciated the

work of radiologists in relation to the diagnosis and the description of the images which completed their views of the diagnostic process. To sum up, the field's trip enabled students appreciate the multidisciplinary approach to patient management values in the psychiatric ward and further enhanced their clinical experience and development goals. Students were shown the different areas of the OT and the procedures they would see. The main aim of the visit was for students to see the workflow and patient care in the OT and for students to meet the OT staff and understand the interdisciplinary nature of patient care. By the end of the visit students should have an understanding of pre-op, intra-op and post-op patient care in the OT.

We extend our sincere gratitude to the Principal, Prof. Mrs. Ginu Anie Joseph & Vice-Principal Prof. Shilpa. J. School of Nursing for their guidance & support. Thanks to the Nursing Faculties and Nursing Students for their dedication and hard work in organizing this event.

TAKEAWAY (OUTCOMES): The event served as an educational and inspirational platform, encouraging participants to take proactive measures in protecting the environment.
