UI/UX Designer Trainee

Job Description

As a UI/UX Designer you'll be responsible for designing the user interface and user experience for different applications such as web and mobile apps. You'll work closely with product team and developers to translate designs into working prototypes and ensure a seamless user experience throughout the app.

Responsibilities:

Able to translate technical requirements into simple, engaging designs

Work across multiple platforms, responsive applications, and a variety of screen sizes, from rough

sketches to highly polished, production-ready mockups

Creating highly usable solutions focused on user experience and brand guidelines

Pay high level of attention to details in the design

Defining and determining the overall aesthetics and visual styles of the product

Providing quality assurance on creative deliverables,

Creating detailed user interface specifications

Work independently on your own ideas and concepts

Keep a close eye on existing design and technology developments and incorporate them into your and teams process

Qualifications:

Having portfolio showcasing UI/UX design work and thought process

Knowledge of any design tools such as Figma/Zeplin or Adobe Creative Suite

Knowledge of user-centered design principles and user research methods

Ability to collaborate with developers and other stakeholders to iterate on designs and deliver high - quality products

Excellent communication skills and ability to give and receive feedback constructively

Knowledge of mobile app design and familiarity with iOS and Android design guidelines is a plus

Bachelor's in Graphic Design, Multimedia Design, Fine Arts or a related field is a plus.
