VALUE ADDED COURSE ON: RENEWABLE ENERGY RESOURCES

Date of Event	09/05/2025 to 23/05/2025
Name of the Event	Value Added Course on: Renewable Energy Resources
Type of the Event	Skill Development
Conducted by	Department of Electrical & Electronics Engineering, School of Engineering & IT, ARKA, JAIN University
No. Of Participants	94

OBJECTIVE:

The primary objective of this course is to enhance students' knowledge and practical understanding of renewable energy technologies, their applications, and their role in sustainable development. The course aims to:

Introduce the fundamentals of various renewable energy sources such as solar, wind, hydro, biomass, and geothermal energy.

Develop technical skills in designing, operating, and maintaining renewable energy systems.

Promote awareness about the environmental, economic, and social benefits of renewable energy adoption.

Encourage innovation and research in clean energy technologies.

Prepare students for careers in the renewable energy sector and equip them to address global energy challenges.

DETAILS:

ARKA Jain University organised the Department of EEE at is organizing a **15-Day Value Added Course on Renewable Energy Resources** from 09/05/2025 to 23/05/2025, aimed at enhancing the knowledge and practical skills of students, faculty, and professionals in the field of sustainable energy. This course will cover various renewable energy sources including solar, wind, hydro, biomass, geothermal, and emerging hybrid systems, with a focus on their working principles, technological applications, environmental benefits, and integration into the power grid. Participants will gain insights through expert lectures, real-world case studies, hands-on sessions with industry-relevant tools such as PVsyst or HOMER, and possibly a field visit or virtual tour of renewable energy facilities. The course also includes interactive modules on energy policy, economics, and sustainable development goals. Open to students, educators, and

industry professionals from multidisciplinary backgrounds, the program will be delivered in online and those who complete the sessions and final assessments will receive a Certificate of Completion.

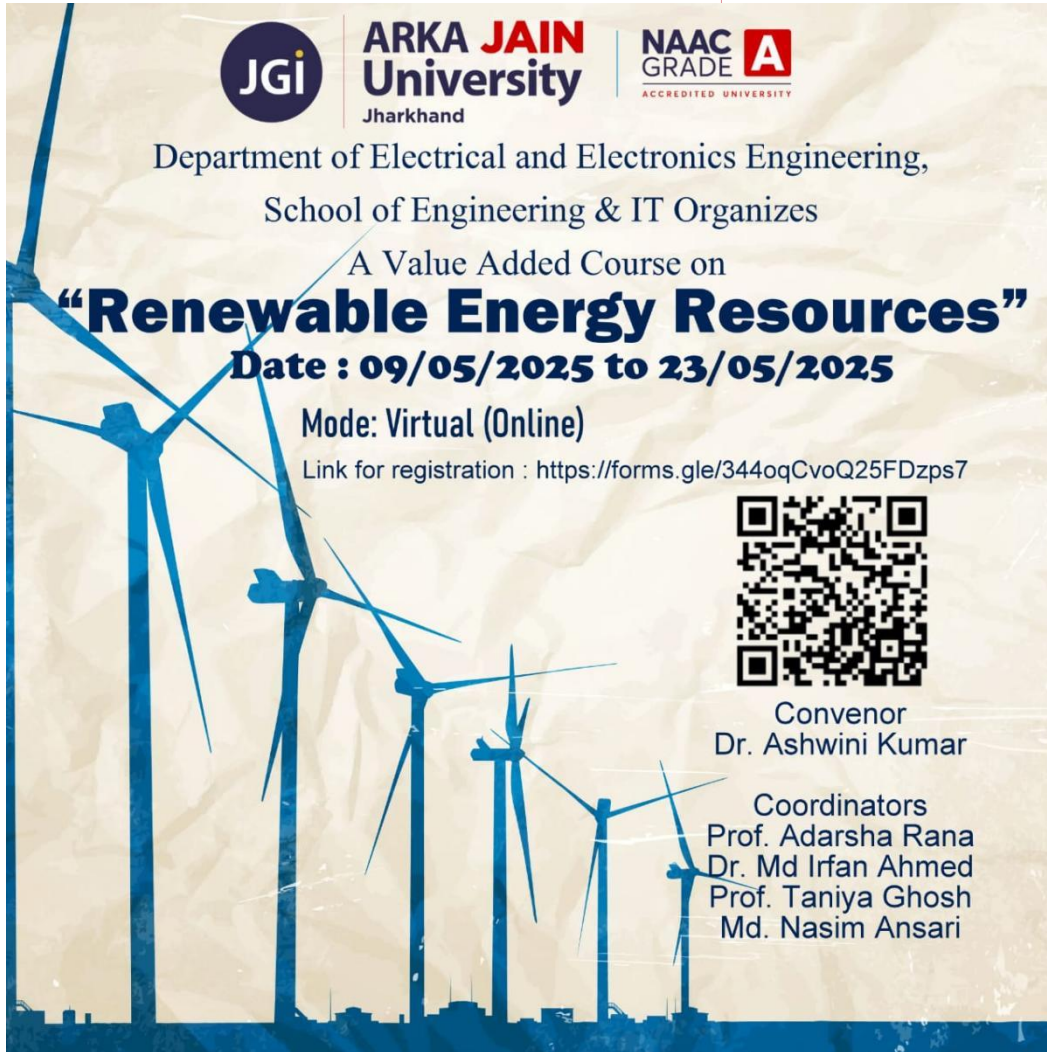

TAKEAWAY (OUTCOMES):

The 15-Day Value Added Course on Renewable Energy Resources will equip participants with a strong foundational understanding of various renewable energy sources, including solar, wind, biomass, hydro, and geothermal systems. By the end of the course, participants will be able to analyze the environmental and economic benefits of renewable energy compared to conventional sources, and apply their knowledge in designing and evaluating basic renewable energy systems using simulation tools such as PVsyst and HOMER. The course will also provide exposure to current industry practices, government policies, and global trends in sustainable energy, thereby enhancing participants' practical skills and employability in the growing green energy sector. Through expert sessions, hands-on activities, and project-based learning, participants will develop the ability to address real-world energy challenges and contribute to sustainable development goals. Successful completion of the course will be recognized with a certificate, adding value to both academic and professional profiles.
