DEPARTMENT: SCHOOL OF PHARMACY NOTICE

No: AJU/SOHAS/168(i)/24 Date 12th Aug 2024

It is hereby notified to all the students of the School of Pharmacy, and ARKA JAIN University that that a 30 Hours Value Added Course on "Molecular Pharmacology" will be conducted from 9th September to 23rd October 2024 by the initiation of the department: School of Pharmacy. Student of ARKA JAIN University with Science background in senior secondary level are eligible to participate this Value Added Course (VAC). The course is coordinated by to Dr. Shweta, Mr. Tunul Guria, Mr. Sai Debasis Panda and Miss Rashmi Tirkey.

The last date of registration will be 5th September 2024. Those students who not done any VACs till date organized by the same coordinators will be given preference.

Date 12th Aug 2024

This is to inform all the registered students and faculty members of School of Pharmacy, ARKA JAIN University that the assessment for the 30 hours Value Added Course on "Molecular Pharmacology" will be conducted as per the schedule follows. The course will be of 30 days (30hrs). Curriculum designing will be done by course developer Dr. Shweta, Mr. Tunul Guria, Mr. Sai Debasis Panda and Miss Rashmi Tirkey. The schemes for assessment will be as one Assignment of 15 marks, Viva of 25 marks, Attendance of 10 marks (>95%=10, 90-94%=5, 75-93%=3), and one assessment of 50 marks (MCQ or short question pattern). Total marks will be of 100 marks. Assessment is of 1.5 hour in offline mode and pass mark will be 50.

MOLECULAR PHARMACOLOGY

Date of Event	09.09.2024- 23.10.2024
Name of the Event	"Molecular Pharmacology" (30 Hours Value-Added Course)
Type of the Event	Value added Course/Slow Learner/ Advance Learner
Conducted by	School of Pharmacy
No. Of Participants	105

OBJECTIVE:

To provide students with a comprehensive understanding of the molecular mechanisms through which drugs exert their effects on biological systems. This course aims to bridge fundamental concepts of pharmacology with recent advances in molecular biology, biochemistry, and biotechnology to enhance student competence in drug-target interactions, receptor signalling, gene expression modulation, and personalized medicine.

DETAILS:

The School of Pharmacy, ARKA JAIN University, Jharkhand offered a 30-hour Value Added Course on Molecular Pharmacology, scheduled from 9th September to 23rd October 2024. The course aims to bridge the gap between classical pharmacology and modern molecular biology by providing an in-depth understanding of drug actions at the molecular and cellular levels. Sessions will be conducted daily from 4:30 PM to 5:30 PM, making it convenient for students to participate alongside their regular academic schedule.

This course is **designed for students from ARKA JAIN University with a science background at the senior secondary level**, and there is **no registration fee**. Interested candidates can enroll by filling out the **online registration form** available at https://forms.gle/QnsLWmf5g2PXpd3WA, with the **last date of registration being 5th September 2024**.

The course will be delivered by experienced faculty members, including **Dr. Shweta (Associate Professor)**, **Miss Rashmi Tirkey**, **Mr. Sai Debasis Panda**, and **Mr. Tunul Guria** (all Assistant Professors, School of Pharmacy). These faculty members have also served as the course developers and will guide students through both theoretical foundations and hands-on techniques in molecular pharmacology.

This value-added course covers a wide range of topics, including drug-receptor interactions, signal transduction pathways (e.g., GPCR, RTKs, ion channels, nuclear receptors), pharmacokinetic and pharmacodynamic principles, drug metabolism (e.g., CYP450 system), pharmacogenomics, and molecular mechanisms of drug resistance. Practical sessions will introduce participants to experimental tools and techniques such as PCR, ELISA, flow cytometry, glucose uptake assays, calcium influx assays, SDS-PAGE, and Western blotting, alongside cell culture methods and cell viability assays.

Participants are expected to maintain regular attendance and complete assignments and assessments to be eligible for certification. This course provides an excellent opportunity

for students to build a strong foundation in molecular pharmacology and gain exposure to current methodologies used in drug discovery and development.

Upon successful completion of the course, participants will be able to:

- ✓ Explain molecular mechanisms of drug action and their biological implications.
- ✓ Describe key signal transduction pathways like GPCR, MAPK, and nuclear receptor signaling.
- ✓ Identify molecular mechanisms of drug toxicity and resistance.
- ✓ Employ biological assays and techniques such as PCR, ELISA, SDS-PAGE, and Western Blotting.
- ✓ Integrate molecular understanding with drug discovery, pharmacogenomics, and ADME profiling.

MINUTE OF MEETING

Agenda 1: Welcome by Dr. Jyotirmaya Sahoo, Dean, School of Pharmacy Discussion

Dr. Jyotirmaya Sahoo welcomed all faculty members and coordinators present in the meeting. He emphasized the significance of interdisciplinary value-added programs in enhancing the academic profile and practical understanding of students.

Agenda 2: Finalization of Course Title and Curriculum Design

Discussion: Considering the relevance of molecular-level insights in pharmacology and the current trends in drug discovery, the title of the Value Added Course was finalized as "Molecular Pharmacology". The course is scheduled for 30 days (30 hours), from 09th September to 23rd October 2024, with a one-hour daily session. The curriculum was designed to integrate theoretical sessions with practical exposure, including modern molecular techniques such as PCR, ELISA, Flow Cytometry, SDS-PAGE, and Western Blotting. Course content also includes signaling pathways, receptor pharmacology, pharmacogenomics, and drug metabolism.

Agenda 3: Faculty Assignment and Resource Person Finalization

Discussion:

The following faculty members were finalized as resource persons and course developers:

Dr. Shweta, Associate Professor

Miss Rashmi Tirkey, Assistant Professor

Mr. Sai Debasis Panda. Assistant Professor

Mr. Tunul Guria, Assistant Professor

Agenda 4: Scheme of Assessment and Certification

Discussion: The assessment scheme was decided as follows:

One Assignment – 10 Marks

Viva Voce - 10 Marks

Attendance – 5 Marks (\geq 95% = 5, 90–94% = 4, 75–89% = 3)

Final Assessment (Offline) – 50 Marks (Duration: 1.5 Hours)

Total Marks: 75

Students must attend all sessions and complete evaluations to qualify for certification.

Agenda 5: Scheduling and Approval by University Authorities

Discussion: The course schedule was prepared in consultation with faculty availability and university calendar. The proposal was submitted to the Vice Chancellor for final approval. Upon approval, a formal notice was circulated among students and staff. Any changes required due to unforeseen academic activities would be communicated immediately.

Agenda 6: Student Awareness and Registration

Discussion: Students were informed about the course via WhatsApp groups, campus notice boards, and the official university website. A Google Form registration link was shared, with the last date of registration fixed as 5th September 2024. All selected students were instructed to attend in uniform and lab coats wherever required.

TAKEAWAY (OUTCOMES):

Students effectively understood the molecular mechanisms of drug action, molecular basis of drug resistance and adverse drug reactions and various molecular pharmacology techniques.

BROCHURE

About The Course:

Molecular Pharmacology explores how drugs interact with biological systems at the molecular and cellular levels. It integrates principles from pharmacology, biochemistry, molecular biology, and physiology to explain drug mechanisms, therapeutic targets, and cellular responses. It bridges the gap between traditional pharmacology and molecular biology by focusing on mechanistic insights, targeted drug action, and experimental techniques used in current biomedical research and drug development. Participants will able to design and test pharmacological hypotheses using molecular techniques, analyse and interpret laboratory data related to drug action, correlate experimental findings with clinical applications, critically evaluate scientific literature in molecular pharmacology.

Course Objectives:

- 2. To describe Signal Transduction Pathways
- 3. To understand molecular Basis of Pharmacokinetics and Pharmacodynamics
- 4. To apply experimental techniques in molecular pharmacology
- 5. To integrate molecular pharmacology with drug discovery and development

Learning Outcomes:

Upon completing this course, participants will be able to:

- 2. Describe Major Signal Transduction Pathways
- 3. Identify Molecular Mechanisms of Drug Toxicity and Resistance
- 4. Apply Experimental Techniques in Molecular Pharmacology
- 5. Integrate Molecular Pharmacology with Drug Discovery Concepts
